

## CONFERENCE SITE

The Ritz Carlton Atlanta is Atlanta's premier business address. The hotel is surrounded by the state's centers of finance and government. The hotel is within walking distance of the Georgia World Congress Center and Centennial Olympic Park and just minutes from sports events at the Georgia Dome, Philips Arena and Turner Field. Only 15 minutes from Hartsfield International Airport and two blocks from I-75/I-85, this Atlanta Hotel is truly a luxurious oasis in the heart of the city. Atlanta's newest attraction is the Georgia Aquarium located near Centennial Olympic Park. The Aquarium is billed as the World's Largest Aquarium. It boasts over 8 million gallons of fresh and marine water, 100,000 animals representing 500 species from around the globe and over 505,000 square feet of total space.

## HOTEL ACCOMMODATIONS

Rooms at the Ritz-Carlton, Atlanta, 181 Peachtree Street, Atlanta, Georgia are being offered at **\$178.00** plus applicable taxes per night. ## OVERVIEW

The goal of the *Primary Care Issues in Men's Health* conference is to increase the awareness of preventable health problems and encourage early detection and treatment of disease among the male population. Faculty members who are both clinically and academically oriented will address topics on common problems encountered in the male population.

## TARGET AUDIENCE

Family Practice physicians, internists, emergency medicine physicians, urologists and other health care professionals who are involved in diagnosing, treating and preventing diseases in the male population.

## OBJECTIVES

Upon completion of this course, the participant should be able to:

- Enhance office skills in screening and diagnosing diseases of the prostate, and discuss available treatment modalities
- Discuss causes of erectile dysfunction, review treatment modalities and potential side effects
- Explore approaches to new therapies in the management of diabetes
- Address guidelines for prevention, management and treatment of hypertension in the male patient
- Define the risk factors, proper testing and appropriate therapy for patients with lipid disorders
- List diagnostic and therapeutic treatment options for acute coronary syndromes
- Describe new developments and treatment options in sexually transmitted diseases
- Review the major risk factors for lung disease, screening, prevention and treatment modalities
- Discuss the use of evidence-based guidelines to improve the identification and treatment options for patients at high risk for DVT and PE
- Recognize the incremental impact of coronary stenting when added to optimal medical therapy for secondary prevention in patients with stable coronary disease
- Describe how to prevent injuries to the "weekend warrior" and how to examine with an anatomical focus to the sports medicine exam, including shoulder, ankle, knee and elbow injuries
- Discuss early detection of metabolic syndrome and reduce the increased risk of type 2 diabetes

## COURSE DIRECTOR:
